Note:

If all income is received on the same schedule,
DO NOT use conversion factors.

Example: alimony = \$100 / month & pension = \$300 / month

If family reports income sources from more than one schedule,
income **MUST** be converted to yearly.

Example: alimony = \$100 / month & pension = \$300 / week

Yearly Income = Monthly x 12
 Yearly Income = Twice Per Month (Bi-Monthly) x 24
 Yearly Income = Every Two Weeks (Bi-Weekly) x 26
 Yearly Income = Weekly x 52

DO NOT round the values resulting from each conversion.
